UniHD at TSAR-2022 Shared Task: Is Compute All We Need for Lexical Simplification?

Dennis Aumiller and Michael Gertz

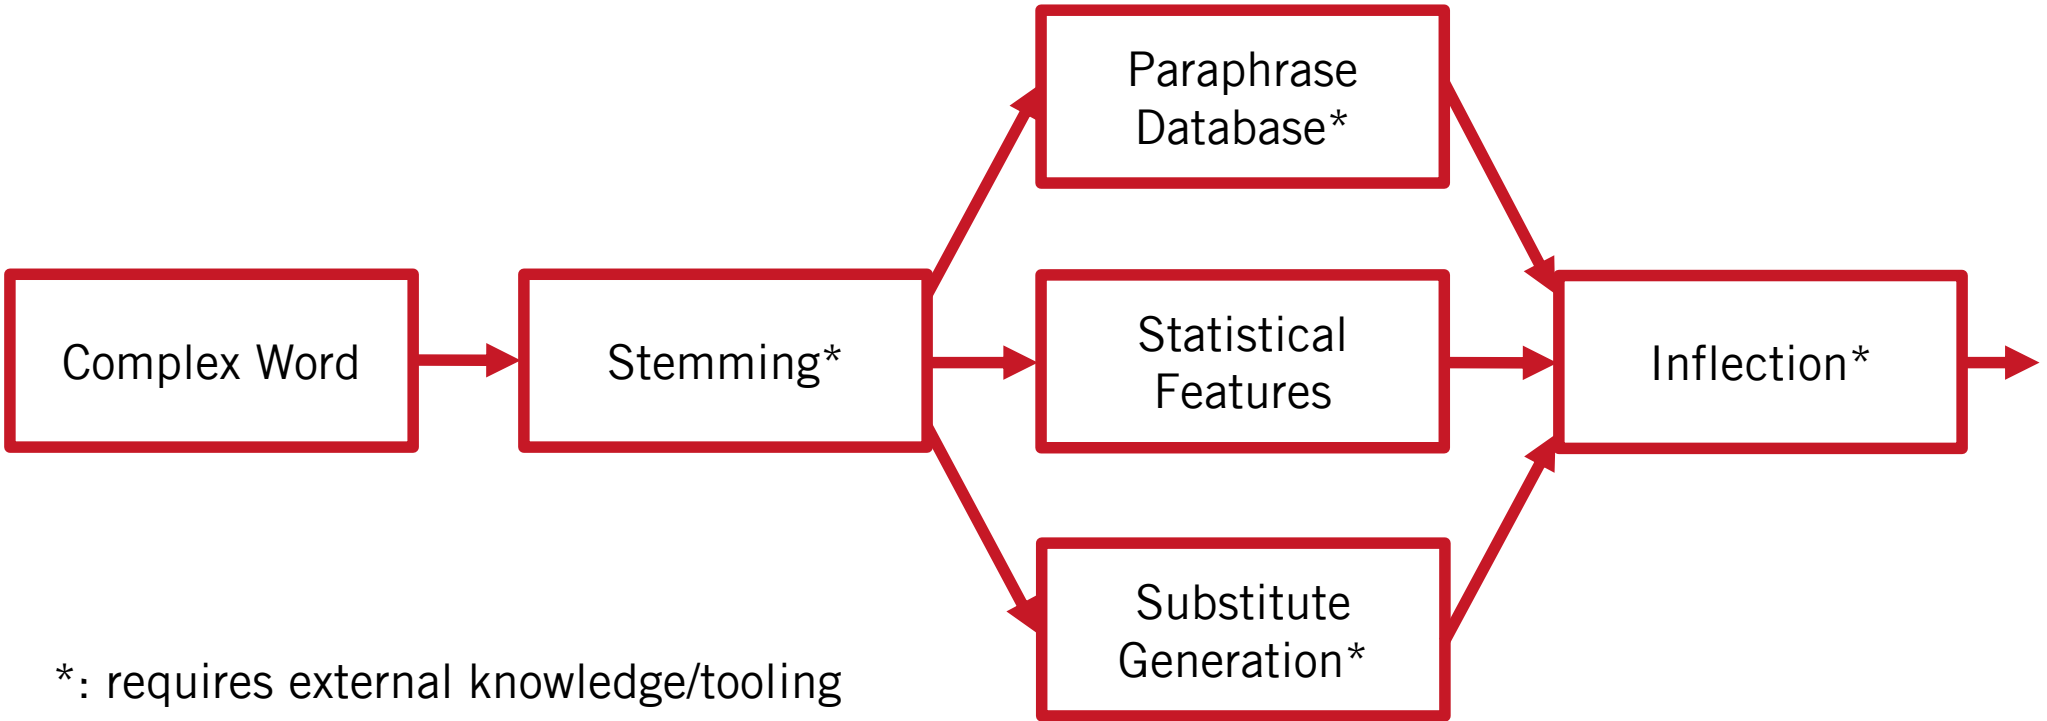

Heidelberg University

Institute of Computer Science

Database Systems Research Group

aumiller@informatik.uni-heidelberg.de

Current Simplification Systems

*: requires external knowledge/tooling

Source: Qiang et al., 2020: LSBert: A Simple Framework for Lexical Simplification

Wishful Thinking

- A **simple pipeline**, that could do all of that (but better?)
 - No domain-specific resources required
 - No tedious adaptation to new domains/languages

Source: <https://freecontent.manning.com/neural-network-architectures/>

Contributions

- Consider very large LMs as zero-shot recommenders for few-shot (contextualized) Lexical Simplification
- Improve prediction diversity and coverage by sampling from multiple system prompts

The Magical World of Prompt Design

Task Setup

- Shared task trial data: only 10 samples
 - Require great zero-shot performance
- Post-filtering as quality control

Source: Wei et al., 2022: Emergent Abilities of Large Language Models

Model Considerations

- Large enough to exhibit emergent behavior
 - >60B parameters
- Provide reasonable API or inference endpoints
- Explicitly trained on (at least) one shared task lang
 - Consider “parameters per language” in train data
- Went with GPT-3 (*text-davinci-002*)

Play around, Find out

- Finding the “best” prompt is difficult
 - No observable gradients
 - Inference costs
- Bigger models -> higher prompt tolerance

Give me five easier to understand synonyms for the following word: instilled

A: imparted, injected, infused, permeated, steeped

Give me five easier to understand synonyms for the following word: instilled

1. implanted
2. inserted
3. infused
4. permeated
5. saturated

Ensuring Structured Outputs

- “Exam question trick”
 - Adding explicit cues improves consistency
 - Still no guarantee for consistency!

Question: List ten alternatives for the word "instilled" that are easier to understand.

Answer:

1. Taught
2. Trained
3. Educated
4. instructed
5. imparted
6. conveyed
7. communicated
8. imparted
9. introduced
10. implanted

Incorporating Context

Context: Rajoy's conservative government had instilled markets with a brief dose of confidence by stepping into Bankia, performing a U-turn on its refusal to spend public money to rescue banks.

Question: Given the above context, list ten alternative words for "instilled" that are easier to understand.

Answer:

1. planted
2. sowed
3. introduced
4. infused
5. instilled
6. imparted
7. injected
8. communicated
9. conveyed
10. transferred

- Downside: More context -> higher inference cost

Filtering

- Merge different output formats
- Filter identity predictions & repetitions
- Remove verbose substitutes

Question: List ten alternatives for the word "maniacs" that are easier to understand.

Answer:

1. people who are out of control
2. people who are crazy
3. people who are insane
4. people who are demented
5. people who are deranged
6. people who are disturbed
7. people who are erratic
8. people who are wild
9. people who are uncontrolled
10. people who are unhinged

Official Results

- Particularly impressive @1 & @3 performance
- @10 performance drops of

Improving Coverage of Predictions

Improving Coverage

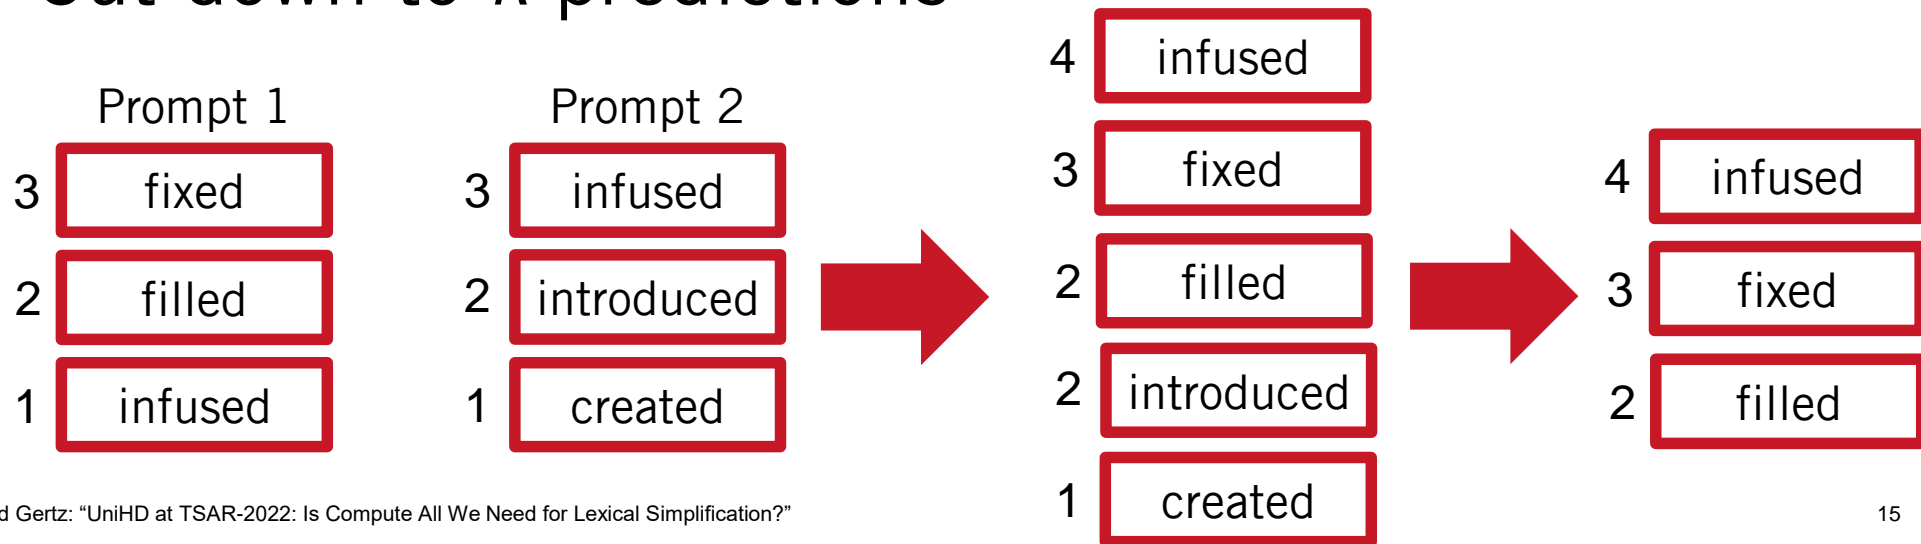

- Filtering removes “too many” candidates
- Candidate sets can be homogenous
- Order of candidates suboptimal

Idea: Query with multiple (different) prompts!

- Add few-shot examples
- With/Without context sentence

Merging Predictions

- Assign scores to each prompt-specific result set
- Aggregate & re-rank based on total score
- Cut down to k predictions

Updated Results

- Slight improvements @1
- Drastically improved @10 performance

Run	ACC@1	Acc@k@Top1			MAP@k			Potential@k

- What if we “ask nicely”?

Context: Además de partidos de fútbol americano, el estadio ha sido utilizado para una gran variedad de eventos, entre los que se destacan varios partidos de la selección nacional de fútbol de los Estados Unidos, y fue el hogar del ahora difunto club de la MLS, el Tampa Bay Mutiny.

Question: Given the above context, list ten alternative words for "difunto" that are easier to understand.

Answer:

1. deceased
2. late
3. departed
4. gone
5. lost
6. forgotten
7. unlamented
8. dead
9. defunct
10. extinct

Context: Además de partidos de fútbol americano, el estadio ha sido utilizado para una gran variedad de eventos, entre los que se destacan varios partidos de la selección nacional de fútbol de los Estados Unidos, y fue el hogar del ahora difunto club de la MLS, el Tampa Bay Mutiny.

Question: Given the above context, list ten alternative Spanish words for "difunto" that are easier to understand.

Answer: 1. Fallecido

2. Difunto
3. Muerto
4. Falecido
5. Difunto
6. Fallecido
7. muerto
8. desaparecido
9. extinto
10. finado

Take Away and Limitations

Is Compute All We Need?

UNIVERSITÄT
HEIDELBERG
ZUKUNFT
SEIT 1386

- **Maybe?**
 - Great performance
 - Expensive inference
 - Hard to steer generation
- Useful for silver labels?

Thank you for your attention!
